

Dot XL-3 RGB

Dot XL-3 RGB is an extra bright dot with 3 LEDs per dot casing. The dots are constructed on a flexible cable with a customizable pitch. The dots are single dot controllable by DMX or e:pix (DVI capable), and are connected per string using the Dot XL Pixel Distributor. The Pixel Distributors can be daisy chained to form large installations.

Product Specifications

Model ¹	Dot XL-3 RGB	Dot XL-3 RGB with diffuser dome
Number of Pixel	56 pixels	
Light Source	3 High intensity Nichia SMT LEDs per dot	
Color Range	16.7 Million additive RGB colors	
Color Resolution	3 x 14-bit (Gamma correction)	
Viewing Angle	120°	170°
Luminous Flux ²	16 lm	11 lm
Efficacy ²	11.7 lm/W	7.3 lm/W
Cover Lens	Clear PVC	Diffuser dome (PC)
LED Pitch	150mm standard; 100mm minimum for customized models	
Lead Cable Length	10m standard	
Housing	Thermoplastic Polyurethane Elastomer (optional nylon clip: see Ordering page for details)	
Adjustment Options	Flexible cable	
Dimensions (Ø x L x H)	Ø36 x 60 x 12mm Ø1.4" x 2.4" x 0.5"	Ø36 x 60 x 27mm Ø1.4" x 2.4" x 1.1"
Weight	25g (Dot); 670g (Pixel Distributor)	
Regulatory Listing & Safety Approval	CE	
Operating Temperature	-20°C to +50°C / -4°F to +122°F	
Storage Temperature	-20°C to +70°C / -40°F to +158°F	
Environment	Outdoor (DotXL - IP66, IP67 rated; Pixel Distributor - IP66 rated; PSU - IP67 rated)	
Humidity	0 to 90% non-condensing	

Electrical Specifications

Operating Voltage	15V DC
Power Consumption ²	1.5W

System Specifications

Power/Data Interface	TX CONNECT
Control	DMX512 / e:pix
Power Supply	LED Engine 150W 15V Outdoor
Addressing Options	Auto-Addressing

1. Diffuser Dome is available upon request. Please consult your regional Traxon office for further details and aid.
2. Measurement per dot.

LED CHARACTERISTICS Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over time – a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicate function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product is NOT suitable for coastal environments. Any such installation will void the product warranty.

Dot XL-3 RGB

Photometrics

Source Specifications

Source	3 LEDs packaged in RGB (One Dot XL-3)
Optics	110°
Cover Lens	Clear PVC
Distribution	Symmetric direct illumination

Candela Distribution

Light Output

Color	Luminous Flux (lm)	Power (Watts)	Efficacy (lm/W)
White	15.79	1.3	12.63
Red	4.47	0.8	5.88
Green	9.97	0.9	11.33
Blue	1.93	0.7	2.97

Illuminance at a Distance

For fc divide by 10.7

Vert. Spread: 112.5°
 Horiz. Spread: 112.6°
 For feet multiply by 3.28

IES and LDT files are available for download from the Traxon website.
