

Glass Touches are a series of user terminals featuring a sleek design with a glass surface, touch-sensitive keys and wheel for user interaction. Designed to work with the Butler XT via the e:bus protocol, the Glass Touch keys and wheel are easily customized using the e:cue software to perform any function according to project requirements. Pleasing to the eye, these devices are the perfect solution for user interaction and control in high-end lighting applications such as hospitality, architectural, healthcare, residential and other projects. Glass Touches are wall mountable, and up to eight units can be connected to a single Butler XT for flexible installation.

KEY FEATURES

- 6 touch keys with status LEDs
- 1 On/Off key
- Remote control via IR-sensor
- Compatible with standard in-wall fittings
- Ultra thin
- Sleek glass front (black & white version)
- Connects via free topology e:cue e:bus (2-wire power and data connection)

PACKAGE CONTENT

• Glass Touch T6	Item-No. see right col.
• Hexagon screw key	130010
• Mounting plate	70124

ACCESSORIES

• IR Remote control	Item-No. 160079
