

Project: _____
 Type: _____

Media Pixel Ribbon DMX VB

The Traxon Media Pixel Ribbon DMX VB is an IP67 flexible neon strip which can be controlled directly using DMX512. The vertical bending (VB), together with the horizontal bending (HB) Ribbon provides flexibility to fit on any curved surface to accommodate architectural structures. Featuring a 16.7mm LED pitch with a 100mm pixel pitch, the Media Pixel Ribbon is available in an assortment of colors and CCT options, has multiple mounting options to meet project needs, and is able to be customized for number of pixels, ribbon lengths, and cable feed position. This product is intended for use in high-quality colored light applications.

Product Specifications

Models	RGB+W (W: 6500K)	RGB	DW (W: 2700K +6500K)	W 6500K	W 4000K	W 3000K
Light Source	High intensity SMT RGB and White LEDs					
Color Range	16.7 Million additive RGB colors					
Pixels	10 pixels/m ¹					
LED pitch	16.7 mm					
Pixel Pitch	100 mm					
Cutting Pitch	100 mm					
CRI for White LED	> 80					
SDCM for White LED	3-steps					
Luminous Flux	410 lm/m	200 lm/m	520 lm/m	530 lm/m	530 lm/m	510 lm/m
Efficacy	28 lm/W	18 lm/W	54 lm/W	55 lm/W	55 lm/W	53 lm/W
Beam Angle	120°					
Housing	Diffused silicone					
Dimensions (W x H)	15 mm x 16 mm					
Max. length	8m / roll	8m / roll	10m / roll	10m / roll	10m / roll	10m / roll
Weight (per roll)	2600 g	2100 g	2600 g	2100 g	2100 g	2100 g
Mounting	Various mounting brackets and channels					
Min. Bend Radius	150 mm					
Regulatory Listing & Safety Approval	CE (cETLus in progress)					
Operating Temperature	-20°C to +50°C					
Storage Temperature	-40°C to +70°C					
Environment	Outdoor, IP67, IK08					
Humidity	0 to 90% non-condensing					

Electrical Specifications

Input Voltage	24V DC					
Power Consumption (Typ)	14.4 W	11 W	9.6 W	9.6 W	9.6 W	9.6 W

System Specifications

Control	DMX512
Power Supply	185W 24V DC Outdoor
Addressing Options	Manual Addressing with 3rd party addressing device

1. Pixel per meter can be customize to 5 pixels, 2 pixels or 1 pixel. Please consult regional sales office for more information, pricing and lead time.

LED CHARACTERISTICS Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over time – a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicate function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product contains a light source of energy efficiency class G to Regulation (EU) No 2019/2015.
 Lumen measurement complies with LM-79-08 standard.
 Lumen maintenance is calculated based on LM-80 compliant measurement.
